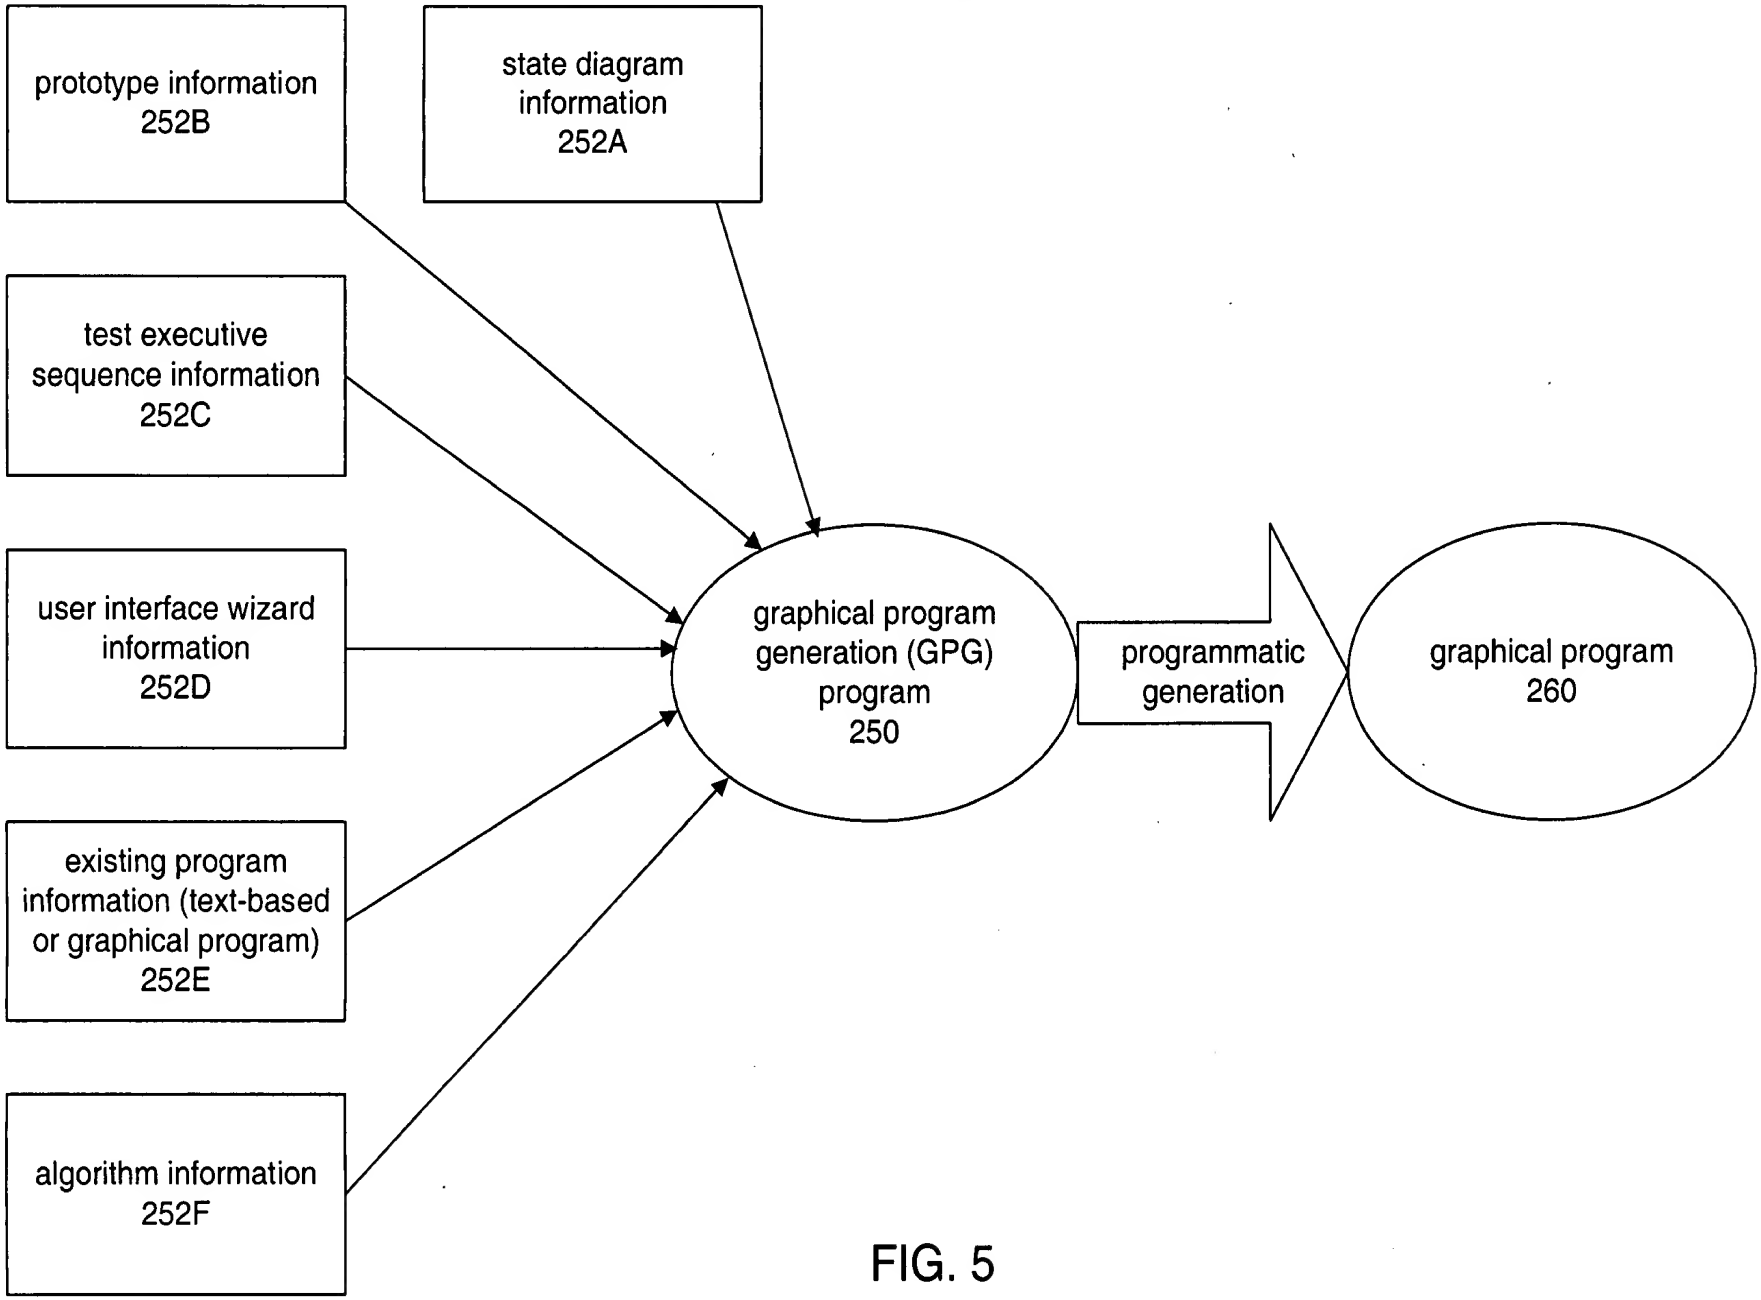

FIG. 5

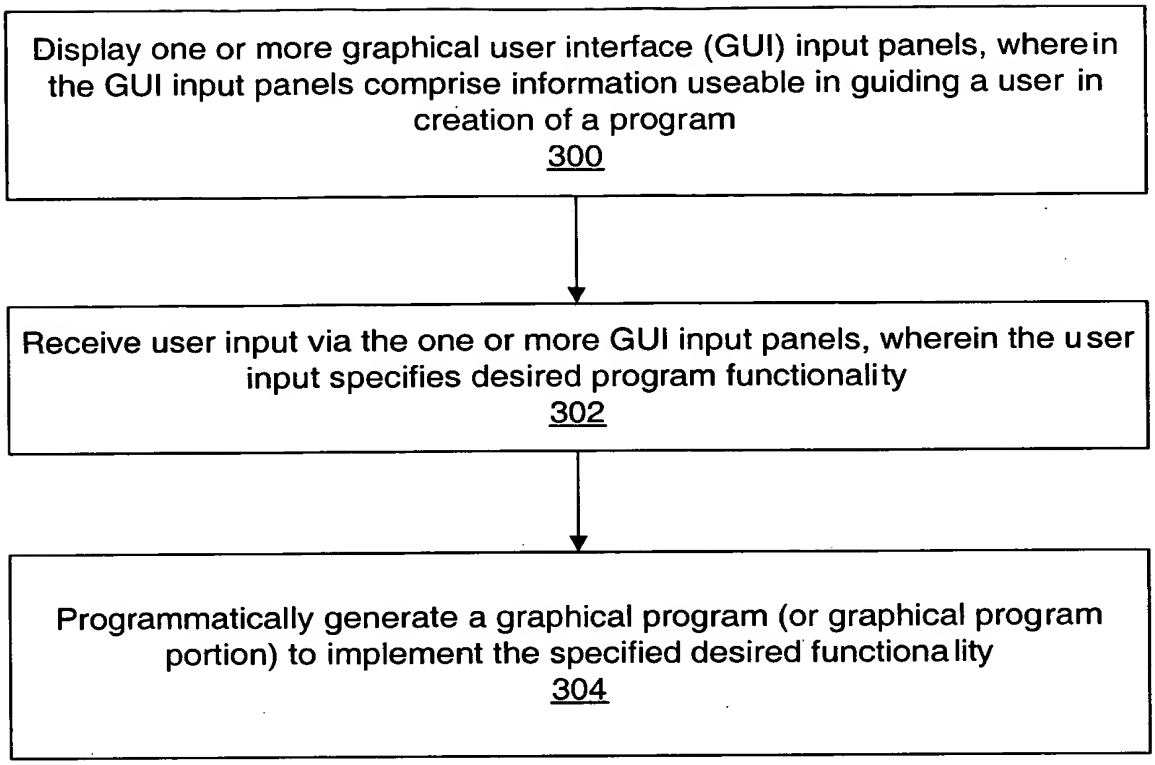

Display one or more graphical user interface (GUI) input panels, wherein the GUI input panels comprise information useable in guiding a user in creation of a program
300
Receive user input via the one or more GUI input panels, wherein the user input specifies desired program functionality
302
Programmatically generate a graphical program (or graphical program portion) to implement the specified desired functionality
304

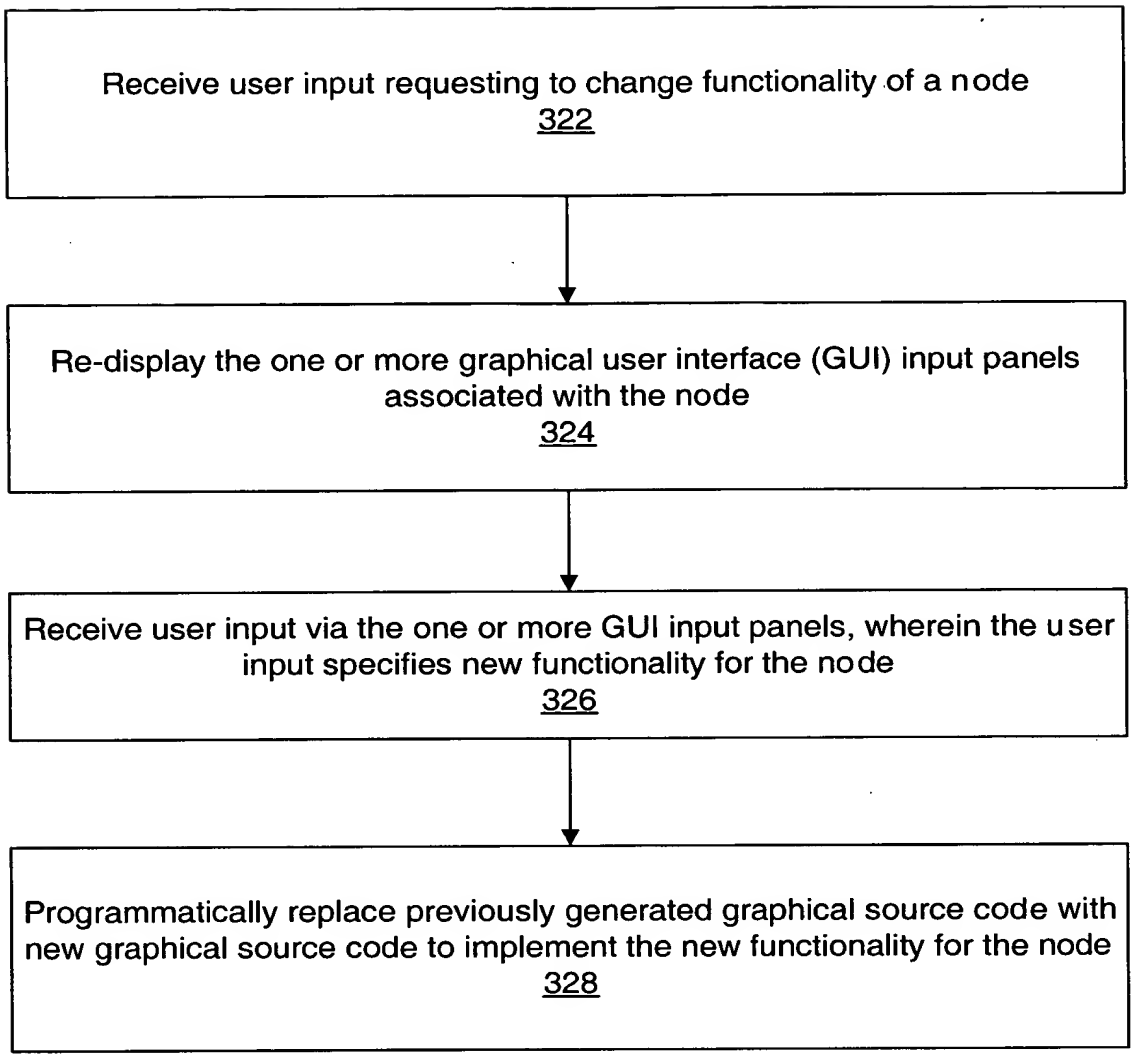
FIG. 14



Receive user input requesting to change functionality of a node
322
Re-display the one or more graphical user interface (GUI) input panels associated with the node
324
Receive user input via the one or more GUI input panels, wherein the user input specifies new functionality for the node
326
Programmatically replace previously generated graphical source code with new graphical source code to implement the new functionality for the node
328
